Sacramento, CA 95814-5512

Re: Docket No. 01-AFC-14

Dear Sir/Madame:

Enclosed for filing with the California Energy Commission are an original and 12 (twelve) copies of the attached **Applicant Status Report #3**. **PLEASE NOTE** – this a revised version of the document that was filed on March 1, 2002. Unfortunately, final revisions had not been incorporated into the document before it was docketed with the Energy Commission.

Sincerely,

A handwritten signature in black ink, appearing to read "Allan J. Thompson", written over a horizontal line.

Docket No. 01-AFC-14

Applicant Status Report #3

Applicant docketed the eight data requests remaining from the second set of Soils & Water Data Requests on February 15, 2002. Of the remaining 156 CEC data requests issued by Staff, the applicant provided comprehensive responses to all but nine data requests. Of the nine-remaining data requests, two were partially answered and responses are being developed for remainder.

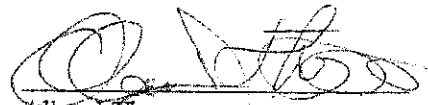

Applicant received a request from the Placer County Air Pollution Control District (PCAPCD) to provide further data and/or explain the data previously presented. The data will be provided to PCAPCD on or before March 11, 2002. Applicant provided the necessary funding to PCAPCD and believes the PCAPCD will be able to issue the Preliminary Determination of Compliance within the next forty-five days. Applicant is working closely with PCAPCD to provide the necessary data for their analysis.

There was a meeting with Western on January 28, 2002 to evaluate the System Impact Study results. It was agreed that the SIS docketed on January 25, 2002 is the base line for establishing the mitigation plan for the REF project. The base line will be used to coordinate the mitigation with the area utilities and California ISO. A schedule for completing the Transmission System Engineering technical analysis and providing the environmental data related to the mitigation plan is being developed and will be provided to the CEC Staff prior to the CEC Committee Status Conference in April, 2002.

Applicant continues to evaluate the three PG&E Gas routes, and the viability of the Rio Linda project, to determine the best alternative for the project and PG&E.

Applicant continues to make progress in the CEC and federal agency licensing processes, and will submit the remainder of the outstanding data responses soon.

Dated: March 4, 2002
